Introduction

Miroboards

Let's brainstorm
based on your own experiences.

**Add a
Hook.**

Pay Heed to Your Presentation's “Hook” from the Get-Go

- Surprise the audience by sharing an unexpected piece of information or interesting statistics.
- Lay a strong foundation for your presentation by including an inspirational and meaningful quote that is relevant to your content.
- Remind them of their own worries and fears to prime their minds for listening to you. Make sure that your statement doesn't scare them.
- Instead of starting off with the lengthy introduction and research, state the problem right up front and clearly.
- Use metaphors to capture the audience's imagination.

**Add a
Personal
Touch.**

Add a Personal Touch

- Greet the audience in their local language and provide local references wherever required to make them feel familiarized.
- Narrate a **personal story** to connect with the audience at the emotional level.
- Include **real-life examples** to make your information easy to remember.
- Add **humor** to add a fun element to your presentation.
- Inject authenticity to make your presentation a unique experience for the audience.

**Watch
your
posture .**

POOR POSTURE

- Feel & look shorter
- Head is forward
- Rounded shoulders
- Sway back
- Weak abs muscles
- Back and neck pain

GOOD POSTURE

- Feel & look taller
- Breathe better
- No back pain
- Increase confidence
- Sleep better
- Improve balancing

Don't sit like a prawn: Posture

- How you present yourself plays a role in your body language and ability to project your voice.
- It also sets the tone for the presentation.
- Remain open, upright, and adaptable while taking the formality of the occasion into account.

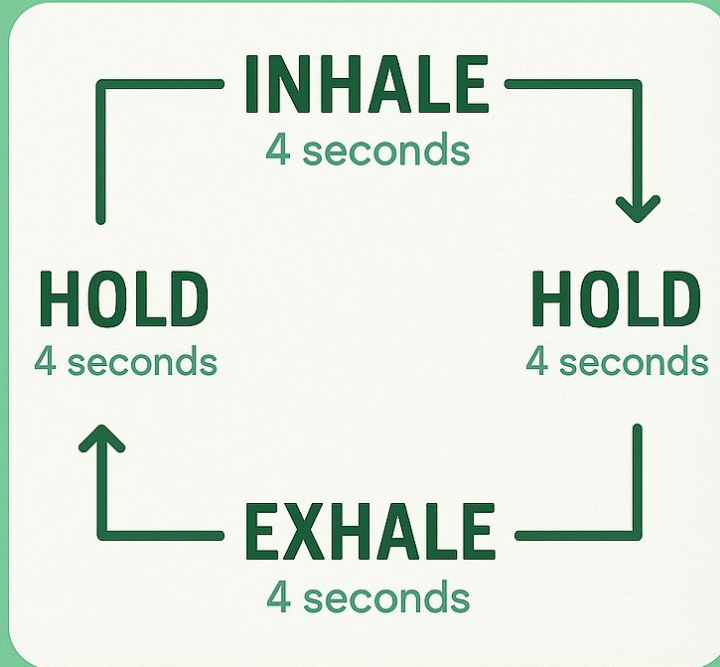

Breathe
correctly .

Breathe right

- Breathing techniques can help quell anxiety, making it easier to shake off pre-presentation jitters and nerves. It also helps relax your muscles and get more oxygen to your brain. For some pre-presentation calmness, you can take deep breaths, slowly inhaling through your nose and exhaling through your mouth.
- While presenting, breathe in through your mouth with the back of your tongue relaxed so your audience doesn't hear a gasping sound. Speak on your exhalation, maintaining a smooth voice.

BOX BREATHING

Breathe In

Hold

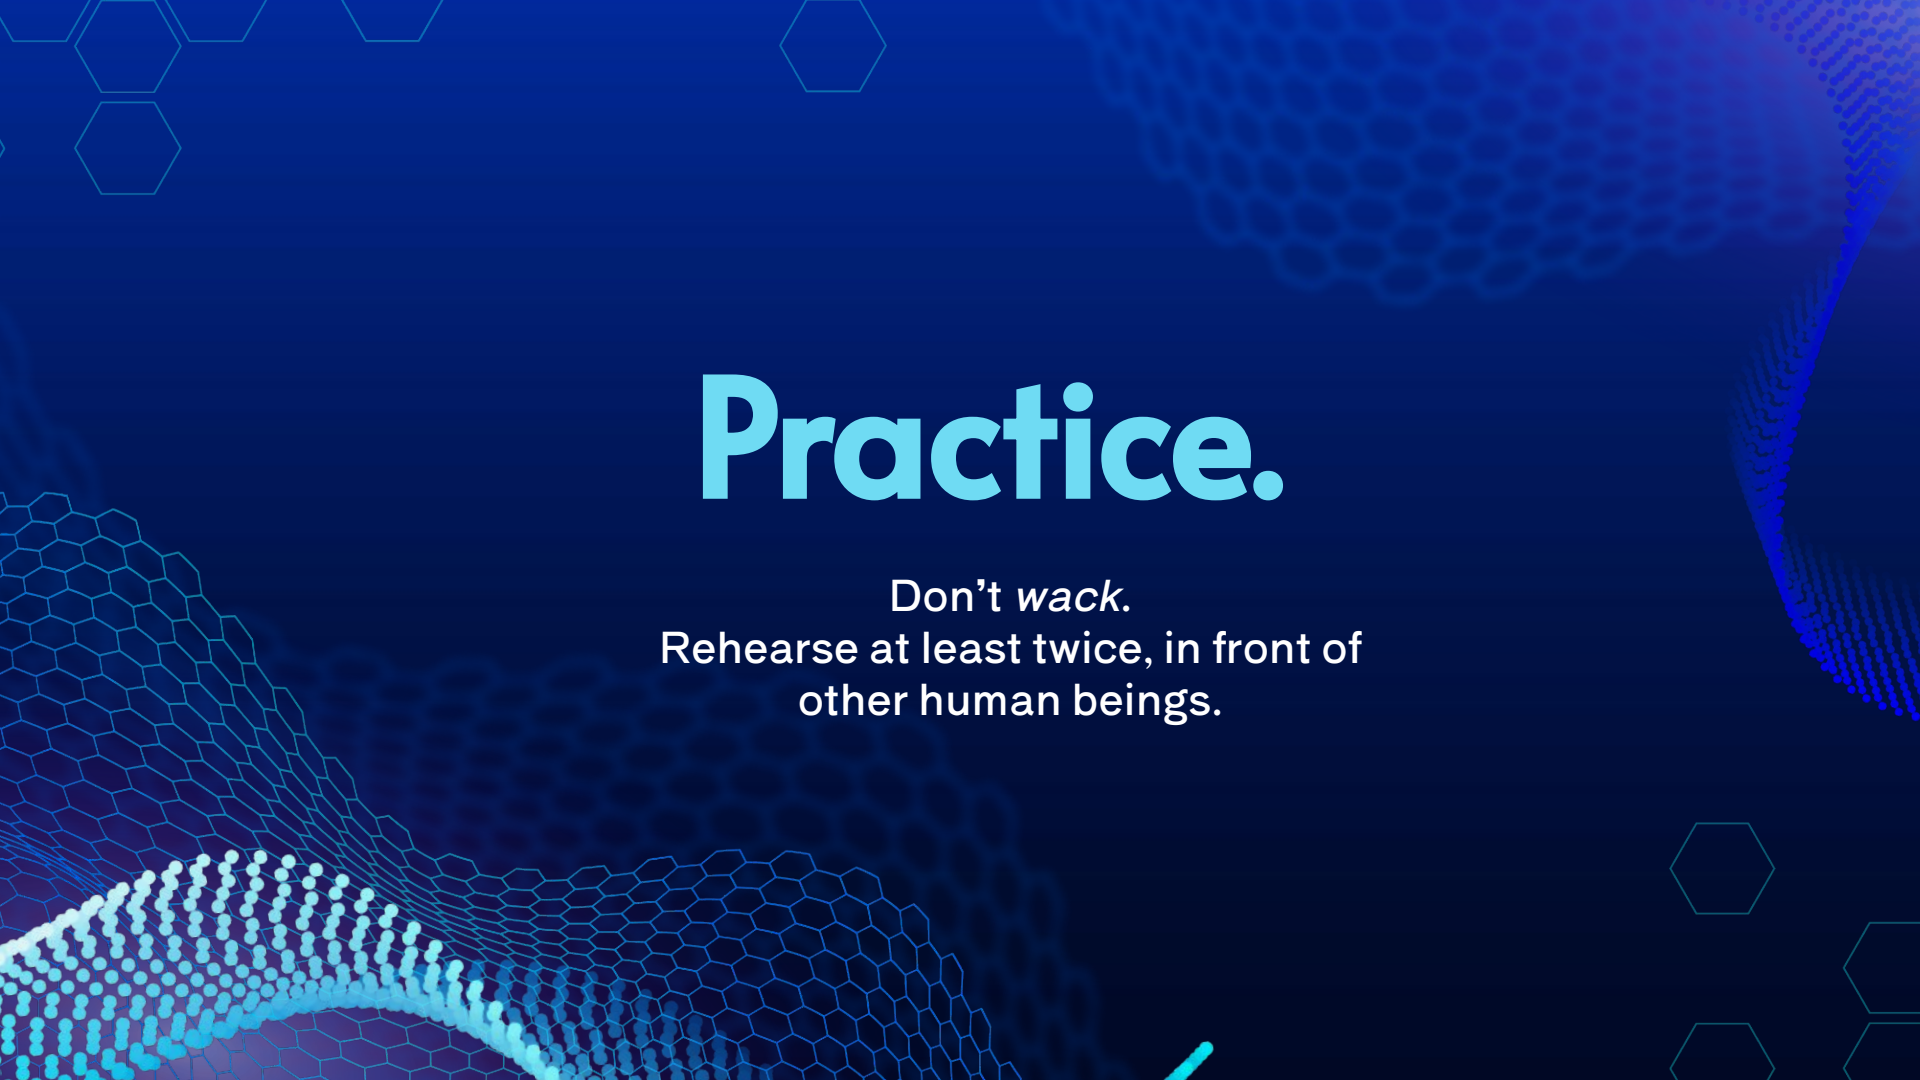

Hold

Breathe Out

**Use
Props.**

The background is a solid dark blue. It features several decorative elements: a series of white-outlined hexagons in the top-left corner; a large, faint, wavy line composed of many small hexagons on the right side; and a series of white dots forming a wavy pattern in the bottom-left corner. The word "Practice." is written in a large, bold, light blue sans-serif font in the center.

Practice.

Don't *wack*.
Rehearse at least twice, in front of
other human beings.

Be prepared: Practice makes perfect

Practice makes perfect, right? If you prepare well before the presentation, you will feel more relaxed and confident while presenting and it will also improve your body language.

Here are some ways to help you prepare for a presentation:

- Rehearse in front of a crowd
- Take notes
- Experiment
- Time yourself
- Record yourself

Storytelling

https://youtu.be/HnIWVs9P5o?si=8_k0TLnSRZ4KvQsG

Conclusion

You have **3-6 months** of probation to make an impression

Kaodim!

Any questions?
