

Unit Outline

COS40006

Computing Technology Project B

Semester 1 2026

Please read this Unit Outline carefully. It includes:

- PART A** Unit summary
- PART B** Your Unit in more detail
- PART C** Further information

PART A: Unit Summary

Unit Code(s)	COS40006
Unit Title	Computing Technology Project B
Duration	1 Semester
Total Contact Hours	24 hours (1-hour Seminar, 1-hour meeting) X 12 Weeks)
Requisites:	
Pre-requisites	COS40005 Computing Technology Project A
Co-requisites	Nil
Concurrent pre-requisites	Nil
Anti-requisites	SWE40002 Software Engineering Project B
Assumed knowledge	Nil
Credit Points	12.5
Campus/Location	Sarawak
Mode of Delivery	Online seminar, supervisory meeting
Assessment Summary	Team Submissions (Sprint Reports, Final Presentation) Individual Submissions (Worklogs, Peer Review and Reflection Report)

Aims

This is a project-based unit in which students work individually, or in teams if the project is a large industry project, to provide students with the skills to generate a computing technology solution to solve one or more industry challenges specifically designed and oriented towards computing technologies. Having an overall focus on computing technology innovation, students will be focusing on the research and development stages of the year-long project continuing on from the work the students completed in COS40005 Computing Technology Project A unit. Teams of students will have a staff member as a 'facilitator' to guide their learning whilst working on their projects.

Unit Learning Outcomes

Students who successfully complete this Unit should be able to:

1. Create real-world computing technology project by applying professional ethical practices as an IT practitioner and by incorporating relevant methods, techniques, tools, processes, and standards
2. Create project and handover strategies that align with ethical standards and meet information security requirements
3. Create structured approaches to planning, execution, monitoring, and delivery of a computing technology project, incorporating requirements engineering, system design and development, risk analysis, quality assurance practices, and change management strategies.

4. Communicate and work effectively within teams and with diverse stakeholders by demonstrating appropriate use of verbal, written, and digital communication strategies tailored to professional and project-specific contexts

Graduate Attributes

The Swinburne Graduate Attributes describe the capability of our graduates to use knowledge, skills and behaviours to contribute to society meaningfully and positively. They include professional, self-directed learning and future-ready skills.

This unit contributes to the development of the following Swinburne Graduate Attributes:

- GA1 Communication - Verbal communication:
- GA2 Communication - Communicating using different media:
- GA3 Teamwork - Collaboration and negotiation:
- GA4 Teamwork – Teamwork roles and processes:
- GA5 Digital Literacies – Information Literacy
- GA6 Digital Literacies – Technical Literacy

Other graduate attributes may be practised in the unit but are not formally taught as part of the unit content, nor incorporated within formal assessment.

Content

- System Quality Assurance and Project Review
- Change Management
- Project Delivery and Handover
- Pitching and Presentation
- Ethical Behaviours and Strategies
- Technical Skills relevant to students major

PART B: Your Unit in more detail

Unit Improvements

Feedback provided by previous students through the Student Survey has resulted in improvements that have been made to this unit. Recent improvements include:

- Updated unit instructions and learning materials

Unit Teaching Staff

Name	Role	Room	Email / Teams	Consultation Times
Brian Loh	Convenor / Lecturer / Tutor	E201	bloh@swinburne.edu.my	Thursday, 2:00 – 3:00 PM Friday, 9:00 – 10:00 AM By appointment

Learning and Teaching Structure

Category	Activity	Total Hours	Hours per Week	Teaching Period Weeks
Live Online / On Campus	Lectures	24 hours	2 hour	Weeks 1 to 12
Live Online / On Campus	Tutorials	24 hours	2 hour	Weeks 1 to 12
Self-study	Independent learning	102 hours	8.5 hours	Weeks 1 to 12

Week by Week Schedule

Week	Week Beginning	Teaching and Learning Activity	Student Task or Assessment
1	Mar 2	Sprint 4 - Sprint plan - Sprint work - Sprint review - Sprint retrospective	
2	Mar 9		
3	Mar 16		Group: Sprint Report #1
4	Mar 23	Sprint 5 - Sprint plan - Sprint work - Sprint review - Sprint retrospective	
5	Mar 30		
6	Apr 6		Individual: Worklog #1 Group: Sprint Report #2
Tuition Week			
7	Apr 20	Sprint 6 - Sprint plan - Sprint work - Sprint review - Sprint retrospective	
8	Apr 27		
9	May 4		Group: Sprint Report #3

10	May 11	Sprint 7 - Sprint plan - Sprint work - Sprint review - Sprint retrospective	
11	May 18		
12	May 25		Individual: Worklog #2 Group: Sprint Report #4, Final Presentation
13	Jun 1		Individual: Reflection report, Peer Review

Assessment

a) Assessment Overview

Tasks and Details	Individual or Group	Weighting	Mapped Unit Learning Outcomes	Mapped Graduate Attributes**	Assessment Due Date
1. Worklog	Individual	10%	All	1	End of Week 6, 12
2. Reflection Report	Individual	10%	All		End of week 13
3. Sprint Reports	Group	60%	All	All	End of Week 3, 6, 9, 12
4. Final Presentation	Group	20%	All	All	Week 12

Assessment Requirements	Details
a) Use of generative AI (genAI) in this unit	The valid use of genAI in this unit is as follows: - The assessments in this unit should be completed without genAI assistance. - Any project work should be completed without genAI assistance - GenAI assistance can only be used for editing and research, however content generated by genAI should not be used in the assessments
b) Hurdle requirements	To pass this unit, you must: - achieve an overall mark for the unit of 50% or more, and - complete the project to an acceptable standard. A rubric will be used to determine if students have met the acceptable standard. The rubric is available on Canvas. Students who do not successfully achieve hurdle requirement (ii), will receive a maximum of 45% as the total mark for the unit.

c) Final assessment period	There is no final examination for this unit. However, some group submissions are scheduled during the examination period.
d) Submission requirements	Assignments and other assessments are generally submitted online through the Canvas assessment submission system which integrates with the Turnitin . Please ensure you keep a copy of all assessments that are submitted. Every group submission should have an • individual contribution statement
e) Extensions and late submissions	Late Submissions - Unless an extension has been approved, late submissions will result in a penalty. You will be penalised 10% of your achieved mark for each working day the task is late, up to a maximum of 5 working days. After 5 working days, a zero result will be recorded. Worklogs will not be accepted after one week.
f) Referencing	To avoid breaching academic integrity, you are required to provide references whenever you include information from other sources in your work and acknowledge when you have used Artificial Intelligence (AI) tools (such as ChatGPT). Further details regarding academic integrity are available in Section C of this document. Referencing conventions required for this unit are: IEEE citation style (https://pitt.libguides.com/citationhelp/ieee) Helpful information on referencing can be found at http://www.swinburne.edu.au/library/referencing/
g) Groupwork guidelines	A group assignment is the collective responsibility of the entire group, and if one member is temporarily unable to contribute, the group should be able to reallocate responsibilities to keep to schedule. In the event of longer-term illness or other serious problems involving a member of group, it is the responsibility of the other members to notify immediately the Unit Convenor or relevant tutor. Group submissions must be submitted with an Assignment Cover Sheet, with individual contribution statement. All group members must be satisfied that the work has been correctly submitted. Any penalties for late submission will generally apply to all group members, not just the person who submitted.

Minimum requirements to pass this Unit

Required Textbook(s)

The required textbook(s) can be purchased from bookshops and may be available through the Swinburne Library or.

There is no textbook for this unit.

Recommended Reading Materials

Swinburne Library has a large collection of resources. Listed below are some references that will provide valuable supplementary information to this unit. It is also recommended that you explore other sources to broaden your understanding.

SCHWABER, K. & BEEDLE, M. 2002. Agile software development with Scrum, Upper Saddle River, NJ, Prentice Hall.

PART C: FURTHER INFORMATION

For further information on any of these topics, refer to Swinburne's Current Students webpage <https://www.swinburne.edu.my/current-students>

Student behaviour and wellbeing

All students are expected to: act with integrity, honesty and fairness; be inclusive, ethical and respectful of others; and appropriately use University resources, information, equipment and facilities. All students are expected to contribute to creating a work and study environment that is safe and free from bullying, violence, discrimination, sexual harassment, vilification and other forms of unacceptable behaviour.

The [Student Handbook](#) describes what students can reasonably expect from Swinburne in order to enjoy a quality learning experience. The Handbook also sets out what is expected of students with regards to your studies and the way you conduct yourself towards other people and property.

You are expected to familiarise yourself with University regulations and policies and are obliged to abide by these, including the [Student Academic Misconduct Regulations](#), [Student General Misconduct Regulations](#) and the [People, Culture and Integrity Policy](#). Any student found to be in breach of these may be subject to disciplinary processes.

Examples of expected behaviours are:

- conducting yourself in teaching areas in a manner that is professional and not disruptive to others
- following specific safety procedures in Swinburne laboratories, such as wearing appropriate footwear and safety equipment, not acting in a manner which is dangerous or disruptive (e.g. playing computer games), and not bringing in food or drink
- following emergency and evacuation procedures and following instructions given by staff/wardens in an emergency response

Canvas

You should regularly log on to the Swinburne learning management system, Canvas. You can access Canvas via the [Current Students](#) webpage or <https://swinburnesarawak.instructure.com/>

Canvas is updated regularly with important unit information and communications.

Communication

All communication will be via your Swinburne email address. If you access your email through a provider other than Swinburne, then it is your responsibility to ensure that your Swinburne email is redirected to your private email address.

Academic Integrity

Academic integrity is about taking responsibility for your learning and submitting work that is honestly your own. It means acknowledging the ideas, contributions and work of others; referencing your sources and acknowledging the use of generative artificial intelligence; contributing fairly to group work; and completing tasks, tests and exams without cheating.

Artificial intelligence tools should only be used where approved by the Unit Convenor.

Swinburne University uses the Turnitin system, which helps to identify inadequate citations, poor paraphrasing and unoriginal work in assignments that are submitted via Canvas. Your Unit Convenor will provide further details.

Plagiarism, collusion, contract cheating, unauthorised file sharing, falsification, fabrication, manipulation or misrepresentation of information, reuse of previous work and non-compliance with instructions in an invigilated or non-invigilated assessment item are all breaches of academic integrity and treated as academic misconduct. Examples of breaches of academic integrity include, but are not limited to:

- submitting work as your own for assessment that has been fully or partially completed by a third party, either paid or unpaid
- using output from artificial intelligence tools (e.g. ChatGPT) in whole or part without acknowledgement and/or without the approval of the Unit Convenor
- using another person's work or ideas as though it is your own work, without appropriate attribution
- working closely with another student or group of students (either past or current), to submit for assessment, some or all of the other student or students' work as your own work
- sharing without permission of the Unit Convenor, Swinburne resources or other material related to assessment to an entity or document repository site
- creating, intentionally modifying or inventing information that is intended to be submitted as part of an assessment item
- using the whole or part of a computer program written by another person as your own without appropriate acknowledgement
- poorly paraphrasing somebody else's work
- using a musical composition or audio, visual, graphic and photographic work created by another person without acknowledgment
- enabling others to cheat, including letting another student copy your work or by giving access to a draft or completed assignment
- letting someone or something else impersonate you, or you impersonate someone else in an invigilated or non-invigilated assessment item
- accessing, obtaining and/or providing to others unauthorised materials relating to an invigilated or non-invigilated assessment item.

The penalties for academic misconduct can be severe, ranging from a zero grade for an assessment task through to exclusion from Swinburne University of Technology Sarawak Campus. For further details, see

[Academic Integrity | Swinburne University, Sarawak, Malaysia](#)

Student support

Swinburne offers a range of services and resources to help you complete your studies successfully. Your Unit Convenor or [Student Counselling and Support](#) can provide information about the study support and other services available for Swinburne students.

For further information, see the [Current students](#) web page.

Special consideration

If your studies have been adversely affected due to serious and unavoidable circumstances outside of your control (e.g. severe illness or unavoidable obligation), you may be able to apply for special consideration (SPC).

Applications for Special Consideration are submitted to Student Central normally no later than 5.00 pm on the third working day after the submission/sitting date for the relevant assessment component. See [Special Consideration | Swinburne University, Sarawak, Malaysia](#)

Note: Submitting fraudulent (fake or altered) medical certificates is considered misconduct and can lead to serious penalties from the University.

AccessAbility Services

If you are a student with a disability, medical or mental health condition or you have significant carer responsibilities, you may require reasonable adjustments to fully access and participate in education. Swinburne's AccessAbility Services can develop an Education Access Plan (EAP) that includes the services and reasonable adjustments that you need.

It is recommended that you register with [AccessAbility Services](#) when you first commence your course but you can contact the service at any time during your studies to find out about reasonable adjustments. Contact Accessibility Services to discuss further.

Review of marks

An independent marker reviews all fail grades for major assessment tasks. In addition, a review of assessment is undertaken if your final result is between 45 and 49 or within 2 marks of any grade threshold.

You can ask the Unit Convenor to check the result for an assessment item or your final result. Your request must be made in writing within 10 working days of receiving the result. The Unit Convenor can discuss the marking criteria with you and check the aggregate marks of assessment components to identify if an error has been made. This is known as local resolution. If you are dissatisfied with the outcome of the local resolution, you can lodge a formal complaint and apply for Reassessment. See [Request a Recheck of Your Mark and Reassessment | Swinburne University, Sarawak, Malaysia](#)

Feedback, complaints and suggestions

In the first instance, discuss any issues with your Unit Convenor. If your concerns are not resolved or you would prefer not to deal with your Unit Convenor, then you can complete a feedback form. See [Complaints & Feedback | Swinburne University, Sarawak, Malaysia](#)
