

Project Closure and Handover

The following diagram is adopted from Managing software projects unit...

Project Inception

There could a lot of reasons for Phase Out/Project Closure...

- Goals and objectives are met :-)
- Agreed deliverables are completed :-)
- Further enhancements to software not economical :-|
- Project runs out of funding :-(
- Termination due to anticipated project failure :-(
- Termination due to changes in business environment :-(

Activities related to project closure..

- Client acceptance (different acceptance testing)
- Handover
 - List of deliverables
 - Deployment?
- Preparing final reports (cleaning up documentation/reports)
- Archiving project artifacts
- Reflection, reflection, reflection

Unexpected issues during project closure...

- Ambiguous/unclear client acceptance procedures
- Not enough time for smooth hand over
- Lack of reflection!!
- Inefficient/rushed archival of project artifacts
- Not enough time for teams to dissolve

Reflection is Important!

- Assessments
- Success
- Challenges
- Skills - useful, need to improve
- Process

- Communication
- ***Lessons learnt!***

Project Handover

...is handing over the deliverables to operational environment, is a process not an event!

Things we need to consider...

- Planning the process
- Deliverables
- Documentation
- Training
- Communication
- Reporting
- Operational process
- Maintenance and update
- Returning resources
- Sign off
