

Sprint 4 Report

Unit code: COS40006

Unit Name: Computing Technology Project B

Submission date:

[This is a template, remove any text within third brackets before submission]

ACKNOWLEDGMENT OF COUNTRY

[Add a statement on acknowledgment of the country.]

Each team member identifies:

the Traditional Owners of the land they lived on while completing this work (if living in Australia)...[Please complete the statement].

CONTRIBUTION SUMMARY (THIS SPRINT)

All team members should complete the following table together. You can provide a yes/no response or a brief comment where appropriate.

	Contribution	Initiatives	Communication					Respect
Team Member	Finished tasks in time or on time with an acceptable quality	Self-assigned tasks and proactively found solutions to problems	Attended all team meetings	Attended all supervisor meetings	Attended all client meetings	Replied every time within an acceptable timeframe	Kept the team updated about the status	The student respected others and listened to different opinions
Member 1								
Member 2								
Member 3								
Member 4								
Member 5								

CONTRIBUTION DETAILS (THIS SPRINT)

In this section, every member of the team should write a summary of what they have contributed during this sprint. All contributions must be supported by evidence, such as the number of GitHub commits, a screenshot of developed screens, a summary/outcome of research, etc.

1. SPRINT PLAN

[This is the very last sprint of this project. This document can be considered as a continuation of all the previous sprint reports. The roles (specifically the scrum master) should be specified for this sprint, and the overall goal of the sprint should be discussed. Ideally, this sprint should not include any new implementation. The main focus should be on wrapping up and handover.]

2. FINAL DELIVERY AND FEEDBACK

[This is our final sprint of the project. The main focus of this sprint should be the delivery of the project. Students need to have extensive meetings with the clients to hand over the project, along with a clear list of what has been achieved, what remains to be done, how to utilize all deliverables, and what improvements are proposed for the future. This section should include the details of the handover plan as well as a report on how the handover went.]

3. SPRINT REVIEW (CRITICAL REVIEW OF THE PRODUCT)

[Add a detailed report on the following

- Progress made on the sprint backlog (description with screenshots)
- Feedback received from the client on the deliverable (must indicate if the increment was deliverable or not, this should include feedback on this sprint only, the overall comment will go to the final report)
- A critical analysis of progress against the plans, particular progress achieved, challenges faced etc. for the deliverable]

4. RETROSPECT (CRITICAL REVIEW OF THE PROCESS)

[This should present a summary on how the overall team process was followed. Challenges, bottlenecks found during the sprint, how they were dealt with, etc.]

5. PROJECT REVIEW

This section should include a detailed description of the overall achievements of the project. Teams are advised to look back at their plan made in the last semester and address the deliverables against the plans made. Any changes in the plans should be justified with the circumstances and evidence. This section should clearly identify what the plans were for this project and what has been achieved by the team.]

6. PROJECT RETROSPECT

[This section should include a critical reflection on the overall process followed, teamwork, and development. The reflection should include (add a summary of what went well, what was good, what was not so good, what could have been done differently to achieve a better outcome, etc for each of the following. This section should have a clear takeaway.):

- Project management approach
- Adherence to ethical standards
- Requirement engineering
- Plan and design
- Quality
- Stakeholder management (client and supervisor)
- Team process]
